Summary

Skilled Front-End Developer and User Experience Designer with over five years of experience in building web applications.

- Front-End developer specialized in React and Angular, coding with JavaScript, TypeScript, HTML, CSS, as well as with C# and .NET.
- UX designer specialized in Design Systems and design thinking process.
- Fully bilingual team player (French) who can positively build rapport with other contributors to improve collaboration.
- Continuous learner who goes above and beyond project scopes to deliver exceptional products.

Professional Work Experience

Senior Frontend Developer The BoxOffice Company

August 2023 - present
Glasgow, UK (Remote)

Front-End developer of the Boost ticketing project, facilitating movie ticketing, seat selection, concession purchase, and gift card redemption.

- Spearheaded the development of new features and expanded business capabilities while coding in TypeScript and using React, Redux, and Jest.
- Added new backend services that handle complex API business logic in C#, using the .NET framework.
- Integrated Sentry plug-in for real-time bug tracking, skillfully identifying and rectifying complex issues, thereby substantially improving product reliability.
- Collaborated with the designers to resolve UX issues in the edge case scenarios, provided corrections, and overall facilitated the design process.

TECH STACK

• React • Redux • Redux Saga • TypeScript • Jest • C# • .NET Framework • Sentry • Google Tag Manager • Google Analytics

User Experience Designer (Design System Owner) Genetec

May 2022 - May 2023
Montréal, Canada

Owner UX designer of the Gelato design system, the main reference guide used by UX designers and front-end developers to build new product features.

- Researched, documented and designed new interface components (e.g. Date Input, Alert, Progress) and supervised UX developers to ensure 100% consistency between Figma and component package.
- Lead the Design Token initiative, which leverages tokens in Figma to accelerate product-specific variations in the UI.
- Inspected new UX prototypes for compliance to the design system, and refined current components in response to new feature requirements.

TECH STACK

• Figma • Design Systems • Design Tokens • Prototyping • Wireframing • UX Design • UI Design • Stencil JS • Web Components

Front-End Developer Behaviour Interactive

November 2021 - April 2022
Montréal, Canada

Front-End developer and UX designer assigned for Behaviour Account, a web platform where gamers manage their account.

- Maintained front-end code of the current Behaviour Account website, where gamers can synchronize their progression in the award-winning Dead by Deadlight game on different platforms (Steam, Stadia).
- Led the UX design process (research, design and code implementation) of a major promotion initiative for an upcoming new game, where gamers will redeem a game reward on the web application.
- Refactored the entire front-end application using React for mobile use, established a design system, and implemented internationalization that supports 12 languages.

TECH STACK

• React • TypeScript • Javascript • Cypress • CSS & SASS • Node JS • Docker • Amazon S3 • OAuth 2.0 • Steam API

Front-End Developer

Intact Insurance

April 2021 - October 2021

Montréal, Canada

Angular developer for building new UI features for Intact's web application for quote generation, used by millions throughout Canada.

- Developed new components using Angular and Storybook while applying reactive patterns in TypeScript (RxJS).
- Built new standalone libraries within the Nx framework for migrating towards micro front-end architecture.
- Implemented comprehensive end-to-end tests with Cypress and increased code coverage from 85% to 100%.
- Independently deployed code to testing environments and prepared Git branches for releases.

TECH STACK

· Angular · Nx · TypeScript · Javascript · Storybook · Cypress · Jenkins · Sass · CSS · Node JS · Docker · OpenShift · Kubernetes · Micro Frontends

Full Stack Web Developer

OneSpan

January 2020 - April 2021

Montréal, Canada

Developer in the Secure Agreement Automation team, a SaaS application for digital authentication, e-signature and audit trail generation for contracts, used by most credit companies in EU.

- Written bash scripts which cut down new client onboarding time from months to several weeks.
- Developed web accessibility-compliant (ADA) UI components in Angular, with SASS and Material UI.
- Implemented unit tests with Karma and Jasmine, and increased code coverage to 100%.
- Integrated front-end application to Gitlab CI/CD pipelines and performed regular deployments using Docker, Kubernetes and OpenShift.

TECH STACK

· Angular · React · TypeScript · Javascript · Storybook · Material UI · Jenkins · BASH · Karma · Node JS · Docker · OpenShift · Kubernetes · CSS · JSS · SASS

Education

Lighthouse Labs

Full Stack Web Development Bootcamp

August 2019 - November 2019

Montréal, QC

McGill University

Bachelor of Science in Architecture

September 2011 - June 2015

Montréal, QC

Galatasaray Lisesi

High School Diploma

September 2006 - June 2011

Istanbul, TR
